## Research Interest

---

Quantum Computing (Quantum Machine Learning, Quantum Cryptography, Quantum Algorithm), Machine Learning, Optimization

## Education

---

**B.Sc in Computer Science**

July 2020 – October 2024

**BRAC University**, Dhaka, Bangladesh

**CGPA: 3.28/4.0**

**Relevant coursework:** Quantum Computing, Artificial Intelligence, Machine Learning, Image Processing, Natural Language Processing, Blockchain & Cryptocurrencies, Computer Security, Randomized Algorithm, Linear Algebra.

## Technical Skills

---

**Programming Languages:** C, Python, Javascript

**Database:** MySQL

**Quantum Computing Libraries:** Qiskit, PennyLane

**ML Libraries & Framework:** TensorFlow, Keras, Scikit-learn, PyTorch

**Data Analysis & Visualization Tools:** NumPy, Pandas, Matplotlib

**Tools & Technologies:** Git, Github, LaTeX

## Experience

---

**Web Design & Development Trainee**

July 2020 – September 2020

ICT division, Dhaka, Bangladesh

## Projects

---

- **Explainable Detection of Online Sexism** ([Code](#)) ([Report](#))
  - TASK A is Binary Sexism Detection: a two-class (or binary) classification where systems have to predict whether a post is sexist or not.
  - TASK B is Category of Sexism: for sexist posts, a four-class classification where systems have to predict one of four categories: (1) threats, (2) derogation, (3) animosity, (4) prejudiced discussions.
- **Signboard Detection Using Deep Learning Based Computer Vision Algorithms** ([Code](#))
  - Evaluated the accuracy of the YOLO V8 algorithm for detecting signboards in Dhaka city, analyzing performance using metrics such as Precision, Recall, and mAP across three sets.
- **Real-Time Traffic Collision Avoiding Game Using Reinforcement Learning** ([Code](#))
  - The goal is to automate playing games using a trained reinforcement learning model to make judgments and automatically recognize and extract game elements in real-time.
  - The game is made by using OpenGL. OpenAI Gym is used to build the environment. Proximal Policy Optimization(PPO) is used for training as it performs better than the state-of-art approach.
- **Diabetes Prediction using Machine Learning** ([Code](#)) ([Report](#))
  - Developed a prediction model utilizing K-Nearest Neighbors, Random Forest, and Naive Bayes Classifier.
- **Animating the Lunar Position with Pygame** ([Code](#))
  - Some computer graphics algorithms, like the DDA algorithm, midpoint line, and midpoint circle drawing algorithm, are used here.

## Research ([Google Scholar](#))

---

- **Audio Classification Using Quantum Techniques.** *Manuscript under preparation*
  - scrutinized the efficiency of hybrid QCNN on audio classification tasks in its NISQ era.

## Certifications

---

- IBM Qiskit Global Summer School 2025 ([Link](#) )
- Summer School on Quantum Computing 2025 at UZH ([Link](#) )
- Solstice of Foundation 2025: Summer School on Quantum Foundation ([Link](#) )
- IBM Qiskit Global Summer School 2024 ([Link](#) )
- IBM Qiskit Global Summer School 2023 ([Link](#) )
- QML Summer School 2023 by Kyiv Academic University ([Link](#) )
- Qubit by Qubit's Introduction to Quantum Computing ([Link](#) )

## Awards & Achievement

---

- **Quantum Excellence Badge, IBM Quantum** *2025, 2024, 2023*  
Awarded for achieving 100% in all lab tasks during Qiskit Global Summer School
- **Deans's List Award, BRAC University** *Fall'2020, Spring'2021*  
Received academic recognition for consistent excellence over two consecutive semesters

## Extracurricular Activity

---

- Junior Executive at BRAC University Chess Club
- Campus Ambassador at English Olympiad, Bangladesh

## Reference

---

- **Shadman Shahriar**    
Lecturer, Department of Computer Science and Engineering, BRAC University
- **Arup Mazumder**    
Doctoral Researcher, University of Rhode Island, USA
